

# Custom Paint Paddles Design Guidelines

Our custom printed paint paddles are printed with a single color imprint.  
Choose from any of the following 6 standard colors:

## Using the Design Template

Choose from our pre-configured or blank templates.

Our preconfigured template has default image and text boxes to help get your design started. Our blank template allows you to add your own image and text boxes as you choose.

## Preconfigured Image Boxes

Click on the image box, then choose a file from your computer to upload.

A high-resolution 1-color black PDF works best. *If you cannot create or access this file type, we will convert your logo into a single color file for imprinting. Not all color logos reproduce well as a single color, so it's best if you can provide a 1-color logo.*

High-resolution black TIFF, PNG or JPG will also work but will need to be converted to vector.

How can you tell if the file resolution is high enough?

The file resolution is generally high enough when you can enlarge the image two to three times the size it might be printed. The image should be very sharp. If the image appears to be very fuzzy, or pixelated, chances are the resolution is not going to yield the best result.

## Preconfigured Text Boxes

Click on the text box and replace the default text with your custom message. **You can change the size, font and color** of the text as well as re-size and move the the text box position (*inside the dotted line*). (*You will need to remove the text from the default boxes if you don't use them.*)

Adding boxes to the blank template-

You can add your own image boxes and text boxes using the Red **Add Image**  and **Add Text**  buttons below the **View PDF**  button.

**IMPORTANT:** The imprint area is indicated with the Magenta dotted line -  
All artwork must remain inside the imprint area.

If you have any questions about creating your design, please contact our customer service via our [LIVE CHAT](#) or call us at **800-323-2193**.
